summary

Computer Engineer with 10 years of experience developing different positions such as; Programmer Analyst, Software Engineer, Technical Leader, Scrum Master and Software Architect. Experience implementing different technologies, tools and frameworks mainly under the jvm. Among the technologies and platforms with more experience I can name the following; Java 1.4/11, JSF, Spring (DI), SpringBoot Microservices, Quarkus, RPA, ORM like Hibernate and Mylbatis, javascript, Weblogic, Jboss, Glassfish, Openshift.

Experience

Sermaluc [2021 July to date]

Software Architect

- Architect in charge of supporting the software factory in which 40 people participate.
- Design and definition of standards and architecture for different clients.
- Logical and technical support to the squads.
- Implementation of training plan to improve the squads skills.

Consorcio Seguros [2019 April to 2021 July]

TI Architect

- Member of the Architecture team in the management of the same name. I have participated in different projects, of which I stand out;
 - Architect assigned for the Openshift platform implementation in the company defining the government for this platform to be released to the software factories.
 - Creation of the secure development manual for the company
 - Inclusion of an automated test plan to be integrated into the Bamboo platform (CI / CD)
 - Participation as a transversal architect in the company's CRM project where I had to define and design all the integrations between the CRM and the business units that must interact. These integrations contemplate different services available both in the cloud and on-premise.

Tools & Frameworks:

Java	AWS Batch	AWS BeanStalk	AWS EC2	Sonarqube
AWS Lambda	AWS Api Gateway	AWS EC2	Springboot	Bitbucket
Pyhton	Prácticas agiles	Bamboo	AWS RDS	Jira
Openshift	Quarkus	Keycloak	Istio	Service Mesh

Deloitte [2018 March to 2018 June]

RPA Senior Consultant

- Team leader RPA, research and implementation of process automation with different tools such as UIPath, BluePrism and Automation Anywhere.

Red To Green [2014 April to 2017 December]

RPA Tech Lead & Scrum Master

- Tech lead for delivery area
- Implementation and maintenance of applications developed in different technologies focused mainly on robotization of processes for different clients.
- Facilitator in different process automation projects using Scrum methodology.

Tools & Frameworks:

Eclipse Neon 2	Automation Anywhere	Jidoka
Daily	Spring Framework	Kanban
Agile	Jira Software	gitlab

Excelsys SPA [2013 March to 2014 March]

Tech Lead & Senior Developer

- Tech Lead of the Banco de Chile's main website.
- Development and maintenance of the J2E application called "Profiling", which is the container for all the applications of the Banco de Chile main website.
- Implementation and maintenance of applications, optimizing requested technical requirements.
- Development and maintenance of JEE applications (Banco Chile payment engine).

Tools & Frameworks:

Eclipse Juno	Sublime Text	Axis 2
--------------	--------------	--------

Weblogic 10.3.5
Agile practices
Jira Software

Sql Developer (Oracle 11g)
Daily
Kanban

Hibernate
Spring DI 2.5
Jquery

Exe Ingeniería [2012 June to 2013 February]

Software Architect

- The main tasks were to provide technical advisory for the different developments, defining technical requirements according to project requirements.
- Complement management tasks, generating weekly metrics, worksheets in which development times and tasks are reported.
- JEE application development
- Research and development of new technologies Jboss (SwithcYard)

Tools & Frameworks:

Eclipse Indigo, Juno
JPA, Rest Easy
Jira Software

Sublime Text 2
Switchyard
Daily

Plannig Game
ExtJs 3.4
Kanban

Imagemaker [2009 November – 2012 June]

Software Architect to Banco Chile [2011 Sept. – 2012 June]

- CI/CD implementation for factory developments, Jenkins server integrated with Sonar, to manage statistics on the quality of the developed code.
- Development server administration, Debian 6 operating system, where the installation and structuring of the WebLogic 10.3.4 application server was configured from the beginning.
- Constant support for development teams, mainly staff with the role of technical leader. I was in charge of the application's architecture definition.
- Tasks carried out in different projects developed in JAVA, different technologies are applied such as STRUTS 1.2, JSF 2, GWT.

Tech Lead to Banco Chile [2011 January – 2011 August]

- In charge of project definitions, technologies and implementation of business logic.

Senior Software Engineer [2009 November – 2011 January]

- Responsible for the implementation of projects with different methods and techniques.

Tools & frameworks:

Eclipse Ganimede, Juno, Indigo
Oracle WorkShop for weblogic
Glassfish, Tomcat, WAS 5.1.2

WAS Developer 5.1.2
Oracle Service Bus
JSF, GWT, STRUTS 1.2

Adobe Flex Buidier 2
Weblogic 12
Toad 9.0.1 PLSQL

Teacher/Professor on Instituto profesional de Chile [2011]

- Professor of Programming Fundamentals, Systems Design and web multimedia.
- Planning of classes, teaching them and evaluating what is understood by the student through instruments defined by the institution.

EGT Ltda. [2008 November –2009 November]

Computer Programmer

- Mainly focused on the development of different systems in j2ee. Developing J2EE projects, Web presentation layer based on EAR, which integrate the use of business logic in EJB3 and for visualization to users in jsf web applications. Systems connected to Postgres and Infomix database engines.
- Development of Web services in EJB3, integrating with other systems databases, in order to have a cohesive environment between applications already developed in other languages.

Tools & frameworks:

Eclipse
Jboss
JPA

NetBeans 6.x
Glassfish
EclipseLink

PgAdmin PostgreSQL
Informix
EJB 3.0 – Web Services

Education

AWS Certified Cloud Practitioner (expires on 25 Sep 2024)

Big Data postgraduate for decision making, Pontificia Universidad Catolica de Chile [currently]

Computer Engineering, Instituto profesional de Chile [2004 - 2009]
